linkedin.com/in/danieljlepiscopo

Cybersecurity professional with 3+ years of networking experience, specializing in threat detection, network defense, and cloud security.

EDUCATION

Anticipated Bachelor of Science in Computer Science

Western Governors University - Starting January 2026

CERTIFICATIONS

[Google Cybersecurity Professional Certification](#)

Cisco CCNA (Expected: 09/25)

CompTIA Security+ (In Progress: 06/25)

ISC2 CISSP (Expected: 12/25)

PROJECTS

Project: Implementing a SOC and Honeypot in Azure

Source: github.com/danieljlepiscopo/windows-honeypot-sentinel

Platforms: Azure Virtual Machines, Microsoft Sentinel (SIEM), Log Analytics

EXPERIENCE

Daniel J. L'Episcopo | danieljlepiscopo.com

April, 2025 - Present

Content Creator & Personal Brand Manager

- Develop and manage a personal cybersecurity brand that showcases original content through blog posts, technical YouTube videos, and a professional portfolio website.
- Create written and video content on cybersecurity topics, including threat detection, network/system defense, incident response, and monitoring—combining practical demonstrations with in-depth technical explanations.

Charter Communications

February 2022 - Present

Network Engineer II

- Engineered and managed LAN/WAN networks, implementing OSPF, EIGRP, BGP, and IS-IS for optimized routing.
- Configured and maintained VLANs, trunking, multicast, and Layer 2/3 protocols to ensure seamless connectivity.
- Resolved network issues in on-call overnight rotations, troubleshooting BGP, firewalls, ACLs, and security policies.

Charter Communications

August 2021 - February 2022

Data Validation

- Validated customer accounts using the CX ID Tool, ensuring data accuracy and integrity across multiple systems and tools.
- Investigated and analyzed data from various sources, including Salesforce, Postman, Granite, APIs, and JSON.

SKILLS AND TECHNOLOGIES

Networking & Security: Firewalls, ACLs, Network Security Groups, SIEM (Sentinel), Cisco, Juniper

Cloud Platforms: Azure, Virtual Machines, Virtual Networks, Cloud Computing

Operating Systems & Administration: Windows 10, Active Directory, File Permissions

Tools: Microsoft Office Suite, Help Desk Systems, Ticketing Systems, Jira, Postman, APIs, JSON
